KNOWLEDGE BACKGROUND

Math, Science, Engineering
Health and Safety
Banking Services
Customer Service & Sales, Account Management
Leadership & Management

DATA SCIENCE | FIELD OPS AND HSE | ENGINEERING TECH

Technical Specialist, with developing competencies in Data Science and Analytics and in-depth experience in Oil & Gas field Ops and Safety Management, as well as Banking Customer Service Management.

I'm now looking to transition into the Business/IT industry as a Data Analyst/Data Scientist. My current career objective is to become an active part of the ongoing Digital Transformation taking place in today's industry, applying real-world solutions to business needs as they arise.

I am an Engineering Technologist by Training (T.T, ASET), with Petroleum Technology and Industrial Chemistry backgrounds. Held and performed Oil and Gas field Specialist roles in Western Canada.

In addition, I do have 7 years of Customer Service, Transaction processing and Bank Branch management experience in a customer-focused and tech-driven retail banking environment.

A continuous and passionate learner, now upskilling in the areas of Data Science and Analytics, Project Management, and current cutting-edge digital transformation knowledge areas.

My core strengths, competencies and skills (influenced by my core values of growth and contribution) include, but are not limited to:

• Initiative-taking and high enthusiasm.
• Tech-savvy, able to interpret and analyze Data in various forms. Excellent in Engineering Math and Statistical Analysis
• Oilfield Operations, Health and Safety Management (Field and Corporate)
• Project Management, Data Analysis and Machine Learning with R and Python
• Great Collaborator, quick learner
• Customer/ Client friendly, warm and articulate personality.

WORK EXPERIENCE
